

**RECHON**  
LIFE SCIENCE

A worldwide pharmaceutical service provider...

with a passion for people's health...

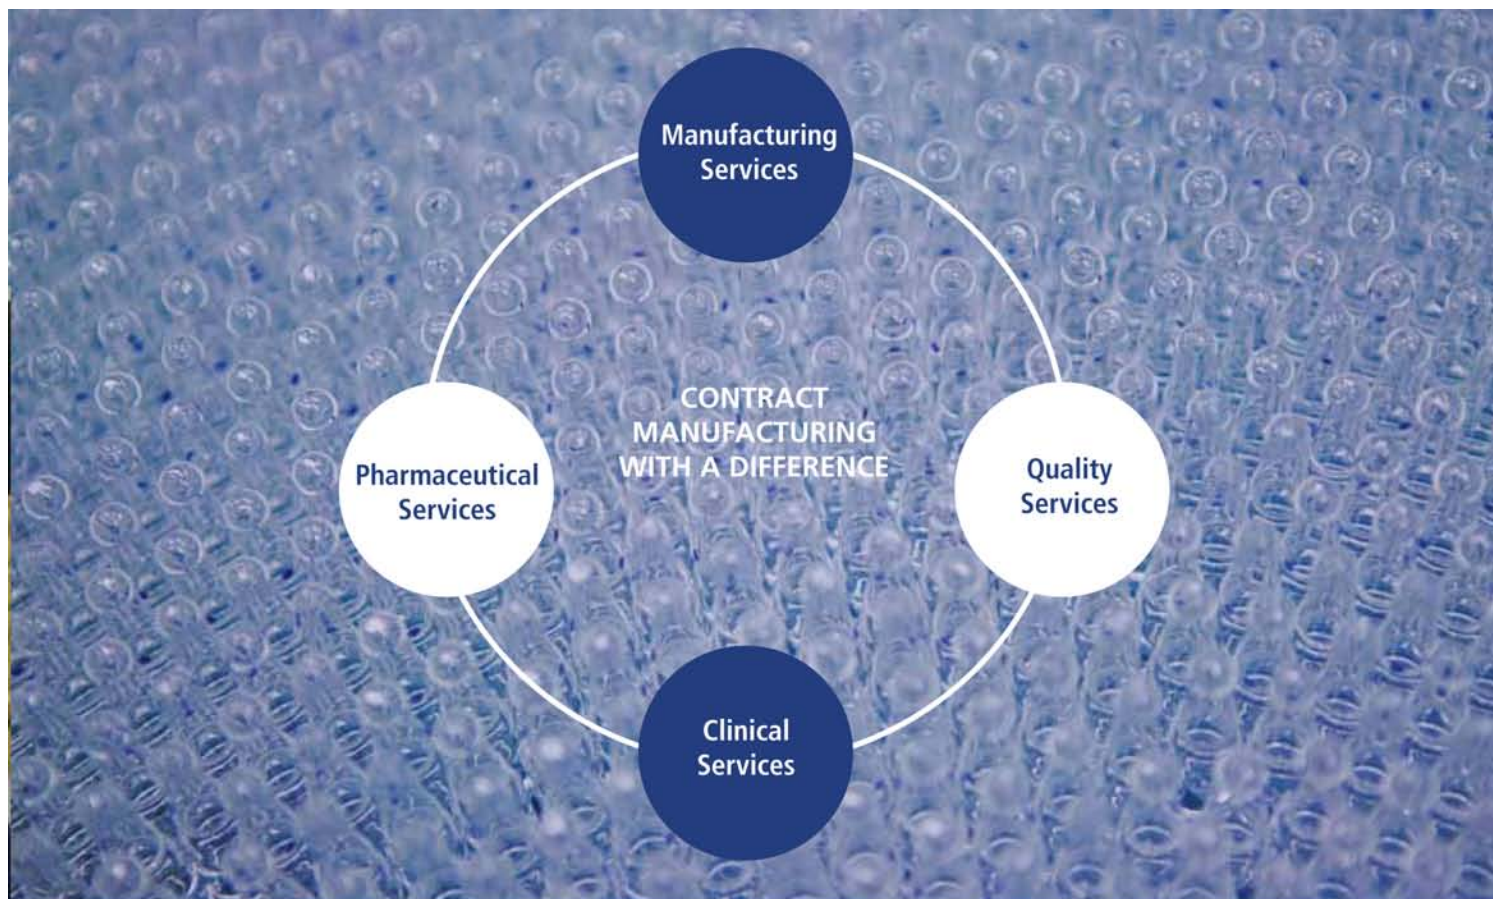

## Rechon Life Science - Your partner through product development to commercial manufacturing

Rechon provide services for pharmaceutical, biotech and life science companies in development and manufacturing of pharmaceutical products such as aseptic vials, ampoules and syringes, oral and nasal products.

Rechon is a manufacturer producing non-sterile, sterile and aseptic liquids from small scale for clinical trials up to full-scale to supply the commercial markets worldwide. We can also assist with QP releases for other types of products and support your regulatory filings.

Rechons dedicated, creative and customer-focused team delivers projects on time with the right quality in a cost-effective way. We are proud to be a supplier of services to all global markets including the US, Japan and Europe.

## Rechon Life Science – Competence and experience

Rechon has a long experience in development and manufacturing of pharmaceuticals with more than 50 years history as Ferring AB. Our extensive experience, competence and technical resources allow us to offer you any service you require within the field of small volume parenterals, oral and nasal liquid products.

Our facility allows us to produce clinical as well as commercial scale batches for global supply. The facility operates under cGMP and is regularly inspected by the Swedish Medical Products Agency, US FDA and other Health Authorities.

## Rechon Life Science - Focus on Your need

Rechon focus on contract pharmaceutical services and collaborate with companies of all sizes, from the smallest start-up to the leading pharmaceutical industries and we are only 25 kilometres from Copenhagen Airport.

We can provide a comprehensive set of services throughout the development process. Our team will work with you to define the best solution for all project phases. We assemble project teams with experts in all areas.

## Rechon Life Science – Contract manufacturing

In our cGMP facility in Limhamn we produce not only commercial scale batches but also small scale batches for development and clinical trials. Our specialties are aseptic filling of ampoules, vials, pre-filled syringes and filling of nasal/oral spray including final packaging.

### Our services include:

- Non-GMP early development material in separate facilities
- Manufacturing of clinical trial material
- Manufacturing and filling of finished products
- Packaging of finished products

Our compounding and filling capabilities allow batch sizes from 1 to 1200 litres, valuable in all steps in the process, from the first clinical batch to the final commercial batch size. The filling lines include rinsing machines, sterilization tunnels and filling & sealing, of injectables and spray products.

In the packaging area Rechon use medium/high speed lines equipped with vision systems and bar code readers for labelling control and check weighing systems for the final control.

Our project team will assist you in all process development and scale-up activities, including validation of each manufacturing step.

## Rechon Life Science – Clinical trial materials & clinical service

Rechon have experience in the manufacturing of clinical trial materials for all stages of clinical development.

### Our services include:

- Clinical manufacturing, phase I, II, III and IV
- Import of clinical trial supplies
- Labelling, packaging, blinding and distribution to clinical sites worldwide
- QP and “Green card” release
- Regulatory support documentation (CMC/Module 3)
- IND and IMPD documentation

Rechon can manage the entire clinical supply chain from manufacture through transport to clinics, returns and destruction.

## Rechon Life Science - Quality services

Rechon can assist you with Audits of suppliers, Product Quality Reviews, QP release, product complaints and other quality and regulatory services.

We can also provide a high-quality analytical service, with skilled and experienced staff and well-equipped laboratories.

### Our chemical and microbiology control laboratories services include:

- Method development
- Method validation
- Stability studies
- Testing of products and starting materials
- Testing of WFI, purified water and media supply
- Environmental monitoring

Rechon can provide the full chain of quality services or assist in specific areas based on your need.

## Rechon Life Science - Securing you to hit your targets

Rechon is your flexible and reliable partner from product development to full-scale manufacturing; your whole chain supplier.

When you are in need of...

- manufacturing services
- quality services
- clinical services
- pharmaceutical services

...Rechon is your first choice securing you to hit your targets.

Rechon is a dedicated, creative and customer-focused team that delivers your project in time with the right quality in a cost-effective way.
